Accountancy

The Accountancy professional major trains students to be qualified, competent and confident accountants. It equips them with strong academic and professional knowledge and skills in key subjects such as accounting, assurance and attestation, law, taxation and information technology. At the same time, students will also receive training in general business knowledge so that they will appreciate the business environment inside and outside the organisation.

The Bachelor of Accountancy Degree is recognised by the Accounting and Corporate Regulatory Authority. The Singapore Accountancy Commission (SAC) has also accredited the Bachelor of Accountancy Degree for direct entry to the Singapore Qualification Programme.

Students will start their programme with the Common Curriculum, and conclude their programme with a case study-based strategy course and an applied research project. They will also be required to complete the non-credit but compulsory programme components: overseas experience, work attachment and service learning. Accountancy professional major students are required to complete 200 credit units (cu). MOUs have also been signed with 15 audit firms to provide work attachments for Accountancy students.
